

THE LEADER IN PERFORMANCE COOLING

HIGH PERFORMANCE IN-TANK FUEL PUMP KITS

Our high flow, high pressure, performance fuel pumps are compatible with Gasoline as well as E85, E100, M100 Ethanol and Methanol fuels. The internal components and materials were specifically selected to perform and last in the special conditions created by exposure to Ethanol and Methanol fuels. These pumps can also be used with Gasoline containing up to a 15% methanol blend. Derale fuel pumps bolt into most factory hanger assemblies. These pumps boast 25 - 35% more flow over factory pumps without modifications to the factory lines, and are ideal for power adders such as supercharged and turbo applications.

- **Pumps Available for 500-900HP+ Applications**
- **High-Flow 100 PSI Pump**
- **100% performance tested**
- **Fits Over 100 Vehicle Applications**

Some wiring harness upgrades may be necessary.
